We located the right place for a Mobile Audiences deep dive: the suburb of Naperville, Illinois, just west of Chicago. The town features a sprawling outdoor history museum that depicts life in Naperville's early days, but with a population of almost 150,000*, it's a thoroughly modern city.

In Naperville, the median age is 35 and median family income is \$127,5541*. The town has a vibrant Main Street shopping area as well as a commercial district with major big-box retailers. These are stats we love to look into, so we decided to study Naperville for two weeks to discover audiences data.

During a two-week period in Q4 of 2018, Complementics engineers geofenced the shopping district to observe mobile device activity throughout the time period. What did we see?

- Activity on 122,271 unique devices and more than 8.8 million events
- Roughly 23,000 devices seen on average 30 times per day
- Visits to more than 15,057 Points of Interest (POIs) in Naperville – an average of 237,331 visits per day
- Retail traffic was booming – Target had 15,314 events, WalMart saw 12,401 and Nordstrom Rack clocked in at 7,556
- The average age was 27 years old
- There were more men than women active – 61.74% men vs 38.2% women

DEEP DATA RICH DATA FOR STUDY

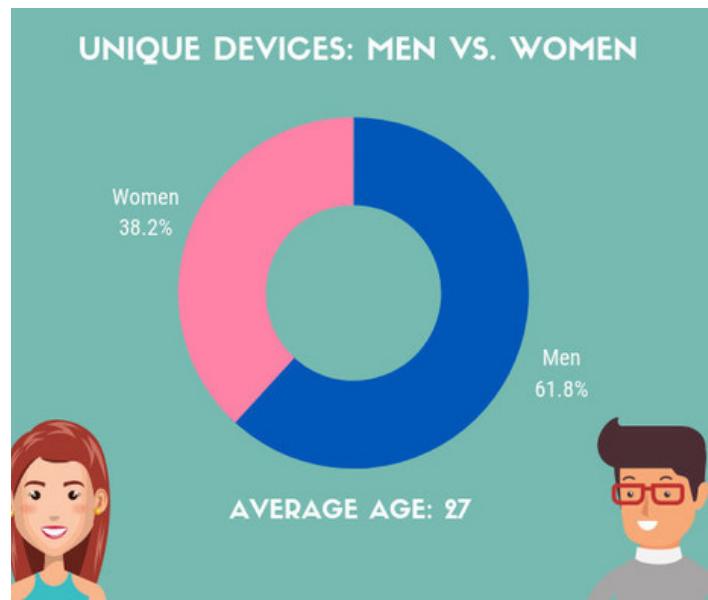

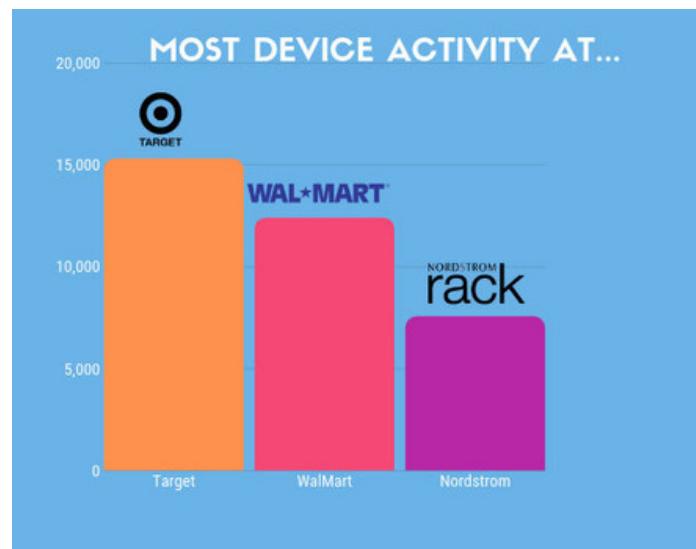

With access to more than a billion devices globally, we can look at almost any POI on the globe to deliver specifics such as mobile device type, age, gender, and more. On average, we can track more than 53 billion events per day from more than 74,979,500 unique devices globally.

We deliver data to our clients at agencies, publishing firms, brands, hedge funds, and more so they can get rich insights.

INSIGHTS WITH MOBILE AUDIENCES DATA YOU CAN...

- Refine audiences for ad targeting
- Deliver better search results to site visitors
- Make smarter decisions about future investments
- Drive visitors to the right content
- Understand brand activity and affinity
- Augment brand loyalty data
- Push the right content to the right person at the right time

Looking at two weeks in one midwestern suburb delivers a lot of data. Imagine what you could do with this kind of data at scale. Peer into activity at points of interest

across a city – or across the globe, dig into activity to see which demographic is visiting your retail locations, or find out if traffic is increasing because of in-market ad campaigns you've placed. Find out more about our data, location services, audiences platforms and more. Visit our location data page, or get in touch with us for more information.
