World's Fastest
Roll Converting Technology

RollRazor focuses on
doing one thing great:
resizing your rolls.

\$10
Studies Show
Lowest cost per converted ton

99.996%
Six Sigma Quality
On finished rolls

3 **World**
Production Records

RollRazor resizes your rolls in less time, at a lower cost.

RollRazor technology is the cost-saving alternative to slitting rolls that delivers Six-Sigma quality in less time. Here's how it works:

01

Cuts parent rolls from
10" up to 132" wide.

02

Intuitive touch screen controls
make RollRazor single operator
simple.

03

Cutting tower traverses over
rolls, making single or multiple
cuts, each taking 3 minutes.

04

Proprietary blade makes single
or multi-cuts, to create press
ready rolls in minutes.

05

Optional robotic finishing
center creates ultra-smooth,
dust-free finish for printing
and writing grades.

RollRazor is the Next Generation in Roll Cutting

Cut rolls unbelievably fast without losing the original mill wind, at a much lower cost-per-ton. With RollRazor, you're creating efficiency and developing a new profit center that can augment your current slitter/rewinder's capabilities while handling special orders and meeting increased demand. Let us show you what your ROI could look like with a RollRazor.
